

SKI COLLECTION

DESIGNED WITH FUNCTION IN MIND.

Ski locker rooms are a popular gathering spot and prime social space. Because they are essential to the overall club experience, they should be comfortable and luxurious. They should be an extension of your brand and reinforce each member's decision that joining your club was the best choice.

At the same time, lockers need to be easy to maintain and clean. Everything should look new for as long as possible and maintain durability without sacrificing the look and feel of premium craftsmanship. Our lockers turn heads and help you convey the privilege associated with access to your facility.

The Hermitage Club at Haystack Mountain

- Shelf units are made from 100% PVC material and engineered into the locker body – these lockers can handle heavy, wet gear.
- Customized air-flow grommets allow increased air circulation.
- Drainage slots, drip pans, and floor drains can be added to integrate with drainage systems.
- Lockers are installed on adjustable plastic feet designed for wet environments.
- Options for integrated boot dryers, ski storage, helmet storage
- Phenolic, Glass, Wood and Laminate exterior options to enhance any design style.
